The Berkeley Changemaker

L&S C12 / UGBA C12

Dates, Units & Grading
Course Meeting Dates and Times:
- Completely asynchronous course lectures; 6 Weeks
2 units, P/NP

Instructors:
Alex Budak (Lead faculty, alexbudak@berkeley.edu) // Laura Paxton Hassner // Rich Lyons // Brandi Pearce // David Porter // Mariana Somma

Berkeley Changemaker Faculty Interviews
Carol Christ // Chancellor of UC Berkeley & English Professor
Janet Yellen // Former Chair of Federal Reserve & Business/Economics Professor
Maximilian Auffhammer // Agricultural & Resource Economics & Int’l & Area Studies
Anthony Cascaridi // Rhetoric, Comparative Literature, and Spanish
Lisa García Bedolla // Education
Ken Goldberg // Engineering
Ron Hassner // Political Science
Glynda Hull // Education
Bob Jacobsen // Physics
Michael Lu // Public Health
Oliver O’Reilly // Mechanical Engineering
Jasper Rine // Molecular and Cell Biology
Ula Taylor // African American Studies
Steve Weber // School of Information and Political Science
Lisa Wymore // Theater, Dance, and Performance Studies

Course Description
Berkeley Changemaker™ impact occurs across many fronts: scientific breakthroughs, artistic imagination, social action projects, and entrepreneurial ventures. This course helps students identify as a Berkeley Changemaker and learn the critical thinking, communication, and collaboration skills to become one.
Combining theoretical and practical topics and bringing perspective from disciplines across UC Berkeley, the course also helps launch the Berkeley Discovery arc. Students develop their own leadership styles and discover how they can create and lead diverse teams – and act upon the world – to effect positive change.
Doubling down on values in Berkeley’s DNA like Questioning the Status Quo and going Beyond Yourself, students learn how to lead from whatever position they occupy and are prepared to leave their mark as a changemaker, whether on campus, in their communities, or beyond.

Community

While all course lectures are taught asynchronously, changemaking is a team sport, and community is core to the Berkeley Changemaker initiative. There are four ways you will engage with others throughout the course:

1. **Live Sessions** (Optional, but highly recommended): Timing TBD. These sections will feature live faculty Q&A; breakout groups with fellow Berkeley Changemakers to discuss course content in small groups, and a chance to meet others passionate about similar areas of change as you. There will be no new content presented during these sections, but you will have lots of opportunity to deepen your understanding and apply your learnings from the week’s lectures.

2. **Changemaker Pods**: Within each section, you will be assigned to a group of ~4 Berkeley Changemakers. In addition to two assignments where you will work together and write about the experience, this group will also serve as your tight-knit community for study groups, bouncing ideas off of one another and supporting each other on your Berkeley Changemaker journey.

3. **Discussion Forums**: many of the assignments will ask you to submit a short personal reflection as well as to comment on your classmates' responses. Here we are looking for comments which are additive -- which move our collective learning forward. While compliments are always welcomed, we ask for your comments to focus on asking insightful questions, practicing critical thinking, and making connections across course concepts.

4. **Office Hours**: your faculty members will hold a number of office hours throughout the course, including 1-1 sessions and small group conversations, as well as special topic office hours (e.g. a student panel with Berkeley Changemaker alumni and a session on entrepreneurship and innovation resources on campus). These will be held at various times of day to be inclusive of students joining from around the world.

Course Structure

The course has four parts that build upon and connect to one another to help you develop your identity as a Berkeley Changemaker.
Part 1: You are a Berkeley Changemaker
Purpose: Seeing yourself as a leader.

Part 2: Changemaking as Questioning
Purpose: Seeing more clearly what needs to change/what questions to ask.

Part 3: Changemaking Together
Purpose: Learning how to work with and through other people to effect change.

Part 4: Changemaking in Practice
Purpose: Discovering how to turn ideas into action.

This course weaves together two strands of learning that will illuminate your Berkeley Changemaker path at Cal and beyond:

**Becoming focuses on YOU.** These sessions help you develop the mindset and leadership skills to lead positive change from wherever you are.

**Discovering focuses on YOUR CHANGE.** These sessions help you uncover the changes you are uniquely suited and inspired to create, as you gain insights, frameworks and tools which will enable you to do so effectively.

In addition to lectures, you’ll be introduced to some of the most distinguished faculty members at UC Berkeley. They will share, in conversational interviews, what it means to be a changemaker in their respective fields — from electrical engineering to theatre. You’ll learn how different disciplines conceive of and implement change, and you’ll be able to start seeing a unique path for yourself as a Berkeley Changemaker irrespective of what you choose to study here.

**Learning Outcomes**
If you fully engage with this class, you will:

- Develop a changemaker mindset — a whole new way of seeing the world and how to improve it.
- Start seeing yourself as a leader who does your most important work through and with others. You’ll practice leadership that drives real change whether you are a scientist, artist, or engineer.
- Understand and practice how to transform an idea for change into real, measurable, and sustainable impact through learning academic frameworks, practical tools and insights from a diverse group of outstanding changemakers.
- Develop rich critical thinking skills which reflect the breadth of disciplines at UC Berkeley.
Sample Syllabus – Summer
Actual syllabus will differ

- Gain confidence in your ability to clearly and persuasively communicate to inspire others.
- Learn how to be a collaborator who brings out the best in your teammates and who understands how to apply lenses of diversity, equity, and inclusion to lead teams which bring out the best in everyone.
- Discover what changemaking looks like in a wide array of disciplines.
- Create bonds with your fellow classmates who will be your changemaking community on campus and beyond in the years to come.

Prerequisites
There are no prior course requirements, only an interest in becoming a Berkeley Changemaker.

Office Hours
Students have the opportunity to meet in office hours in both small groups as well as 1-1 with the course instructors. The course instructors will have weekly office hours spread throughout the course, offered at different times taking into account student’s varied schedules and time zones, where students may drop-in to a zoom chatroom and join other students to ask questions via video or text chat. Students may also make individual office hours appointments with the course instructor by emailing them and requesting to meet one-on-one. Office hours meetings take place via Zoom. 1-1 Office hours appointments will typically be 20 minutes long, but can be extended depending on the topic to be discussed.

Course Materials and Technical Requirements

Required Materials
All students must have access to a computer with Internet connectivity, which will allow them to access course announcements, readings, and instructor-posted materials through the bCourses site. Students should also be able to watch television texts (via YouTube or other sites) and interact with (or simply observe) social media platforms on their computers. Students must also compose their exams on a computer and submit their completed papers and projects electronically on bCourses -- handwritten submissions will not be accepted.

The purchase of a course reader via study.net is required for this course.

Technical Requirements
This course is built on a Learning Management system (LMS) called Canvas and you will need to meet these computer specifications to participate within this online platform.
Optional
Canvas allows you to record audio or video files of yourself and upload them in the course. To use these features, you will need to have a webcam and a microphone installed on your computer. Students will not be required to use a video camera in order to access course content or to participate in synchronous remote class sessions.

Technical Support
If you are having technical difficulties please alert one of the GSIs immediately. However, understand that neither the GSIs, nor the instructors can assist you with technical problems. You must call or email tech support and make sure you resolve any issues immediately.

In your course, click on the "Help" button on the bottom left of the global navigation menu. Be sure to document (save emails and transaction numbers) for all interactions with tech support. Extensions and late submissions will not be accepted due to “technical difficulties.”

Learning Activities
Sections
For grading purposes, each of you has been assigned to one of the course Readers/GSIs and placed within their section. Your particular Reader/GSI will grade all of your work, as well as that of your section-mates, and engage with you in the course discussions. To find out whose section you've been placed in, go to bCourses, click on “People” on the left side of the screen, find your own name, and then look across at the “Section” column – you will see your section assignment there (e.g., “Megan’s Section,” “Sonali’s Section,” “Ibrahim’s Section,” etc.).

Reading Assignments
Each module includes assigned readings relevant to each topic covered in that module. Each module also includes a number of optional readings you may decide to read to go deeper into a specific topic or discipline.

Multimedia Lectures
Recorded lectures support your readings and assignments but also contain additional material that may be required to complete written assignments. Each lecture has been broken into sections. You are expected to take notes while viewing the lectures as you would in a regular classroom.
Grading

Your final course grade will be calculated as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Short Reflections &amp; Discussion Forums</td>
<td>40</td>
</tr>
<tr>
<td>Video Assignment</td>
<td>20</td>
</tr>
<tr>
<td>Written Assignments</td>
<td>65</td>
</tr>
<tr>
<td>Final Project</td>
<td>25</td>
</tr>
</tbody>
</table>

Assignment Overview

Assignments ask you to engage with the course through multiple modalities including reading, writing, reflecting, storytelling, and going out and interacting with people outside of the class. In every assignment, be sure to consciously apply concepts you learn in lectures, readings and videos to connect your own experience to the course content.

Each session has one assignment. Of the 15 assignments, there are:

- 8 prompts where you will write a short response on bCourses and in 3 instances also provide comments for your classmates. These will all be shared publicly with fellow students in your section. (40 total points / 5 points each)
- 1 video assignment where you will upload a video to the bCourses discussion board and comment on at least 5 of your classmates' videos. This will be shared publicly with fellow students in your section (20 total points)
- 6 written assignments. These will all be shared privately and only seen by the instructor and section leaders:
  - A reflection paper on a “smart risk” you have taken and the lessons you have learned from taking it (10 total points)
  - A 1 page paper on designing a high-impact team (10 total points)
  - A 1-2 page paper on reframing a problem (10 total points)
  - A 2-3 page essay on the topic of leadership (20 total points)
Sample Syllabus – Summer
Actual syllabus will differ

- A 2-3 page “Berkeley Changemaker Vision” paper (15 total points)
- A final project where you will identify a change you would like to make and detail a strategy to take action on it. (25 total points)

Late assignments will receive a penalty of 10% per day that it is late and anything turned in one minute or more after the deadline will count as late.

Grading rubrics which detail exactly what we are looking for and how your assignments will be scored are available for every assignment. While viewing an assignment in bCourses, click on the three dots in the top right-hand corner, and then “view rubric.”

Short Reflections & Discussion Forums - 40 points

Many sessions contain a number of short writing assignments in which we ask you to write reflectively and critically about a topic from lecture videos. Your posts and responses are considered your class participation and represent a unique opportunity for you to exchange views with your group-mates, share experiences and resources, and ensure your understanding of the course material.

Discussion groups have been pre-assigned and include other members of your GSI section. When you navigate to a discussion forum, you will automatically be taken to your group's instance of that discussion and to your group's space within the course. When finished with the discussion, you will need to navigate from your group space back to the main course space in order to continue participating in other aspects of the course.

There are 8 short writing assignments to be posted to bCourses. Some of these will be open-ended while others will ask you to use a specific template to format your answers. For details on each of these short reflections, please see the course outline for a session-by-session breakdown.

When assigned to write one paragraph, your reflections should be substantive, original and at least six sentences long.

In many instances, you are also required to provide thoughtful comments on a classmates' writing to encourage interaction and learning from one another. You may write a question, or a comment, but in either case your interaction should be at least two sentences in length and should add to our collective learning. You may comment directly on someone's post by hitting the ‘reply’ button.

-BECOME A BERKELEY CHANGEMAKER: MINDSET

# Becoming

Ken Goldberg, William S. Floyd Jr. Distinguished Chair in Engineering, UC Berkeley; Professor, Industrial Engineering and Operations Research

What enabled you to take this risk and what lessons might you apply from it as you take more smart risks as a Berkeley Changemaker?

Write a 2 page double-spaced paper on this smart risk, bringing in concepts from lectures, readings and videos.

POSSIBLE POINTS: 10 total.

In this session we will explore the crucial traits and attributes successful changemakers have -- all of which are learnable, practicable and applicable across diverse roles and sectors. We will specifically cover how changemakers can learn to question the status quo, how to develop a growth mindset, and what resilience is and why it matters.

## Reading

## Overview

In the next three sessions of the class, we introduce four elements of critical thinking that Changemakers need to learn in

### Session 3

Critical Thinking: How to Ask the Right Questions

Think about an area of change about which you are passionate. This could be in your local community, in your field of interest, or in the world at large. This might be a social cause you’d like to explore, a new product you’d like to create, a scientific or artistic endeavor you hope to make a reality, or a business you’re thinking about starting. Have a conversation with at least one person who is engaged in this area. Note that you are not looking for solutions yet -- you are simply practicing asking great questions and seeking to learn as much as you can.

Thinking about the frameworks you learned from the video, answer the following three questions on bCourses:

- **Critical Thinking:** How to Ask the Right Questions
- **Faculty Interview:** Carol Christ, 11th Chancellor of the University of California, Berkeley
- **Reading:** Vallée, Manuel. “Critical Reading in
order to imagine and design alternative futures. Academic disciplines structure this process in different ways (do the readings on critical thinking in the natural sciences, the social sciences, and the humanities to get a sense of some of the dominant approaches).

Through lectures and especially in readings, we will introduce you to multiple approaches and methodologies for critical thinking (“objective analysis and evaluation of an issue in order to form a judgment”) including scientific method and systems thinking. And through a more specific focus in the next two lectures on the tools of “Design Thinking” we will help you practice and apply this particular critical thinking approach as you explore meaningful problems you might be inspired to solve.

# Sample Syllabus – Summer

**Actual syllabus will differ**

This session, we will learn how to launch and develop a high impact team over time. Our hope is to provide you with an opportunity to reflect on the importance of creating the team conditions that will support you in leading through and with others. We also aim to provide you with tactical practices and tools to scaffold you in your team efforts to power change as you launch your educational experience here at UC Berkeley. Topics include:

- Launching a High Impact Team to Power Change
- Crafting Team Goals with Purpose
- Coordinating Knowledge to foster inclusive and creative solutions
- Creating shared team values and dynamics that support out of the box thinking and a positive team climate
- Developing our teams over time

- Pearce, B.M. “Note & Tool: Launching a Team for High Impact to Power Changemaking.”

REFLECTION: No matter your academic discipline, you can be a Berkeley Changemaker. The Berkeley Changemaker Faculty Interviews have shown how different disciplines approach changemaking in different ways. Compare and contrast two disciplines' approaches to changemaking which you discovered in these video interviews, and share 1-2 takeaways for your own Berkeley Changemaker journey.

DISCUSSION: Write 1-2 paragraphs on bCourses reflecting on diverse approaches to changemaking.

POSSIBLE POINTS: 5 total
glorify the lone entrepreneur, the solo innovator, the single changemaker, the truth is that real change takes all of us pursuing meaningful change in our own way. Often, this means leading change from within an organization -- whether a company, a hospital, a theatre or a lab. This session explores what research shows are the most common reasons change initiatives fail (and how we can proactively work to overcome them), as well as strategies for leading and leveraging change within existing structures.

### Overview

**Session 13**

*From Idea to Action: Changemaking and the Art of Agency*

*Change requires action! After all, it’s changemaking, not “change thinking!” This session helps you move from that crucial (and often confusing) first stage of having an idea for change but being unsure what to do to develop the confidence and skills how to start making real change happen.

**Media**

Alex Budak

*Faculty Interview*

#Discovering

Jasper Rine, Richard and Rhoda Goldman Professor of Genetics and Development

**Assignments**

REFLECTION: Whether or not we are an entrepreneur, we can all think and act entrepreneurially. As this session’s lectures and Steve Blank’s article teach us, the Lean Startup methodology — which itself is rooted in the scientific method — can be applied to change initiatives of all kinds. Write 1 paragraph where you apply insights on how the lean startup model can help you turn your own change initiative idea into action.

POSSIBLE POINTS: 5 total (3 for your paragraph; 1 each for two comments on others’ posts)

<td>Berkeley Changemaker Vision Paper: Close your eyes and imagine that it's your graduation day from UC Berkeley. (Okay, now open your eyes so you can read the rest of the assignment). This paper asks you to paint a picture for your time at UC Berkeley (whether that's 1, 2, 3, or 4 years from now), and detail what you will do between now and then as a Berkeley Changemaker based on what you've learned in this course. What are your goals and aspirations? And how will your newly-developed Berkeley changemaker identity and skills help make those goals achievable for you? Write a letter of advice to yourself right now from your future self (the Cal graduate you will become), advising yourself on achieving those goals by applying Berkeley Changemaker lessons from the class. Write a 2-3 page double space) letter describing your dreams and goals during your time at Cal, and identify and explain how a minimum of 4 specific lessons from class (more are welcome) will help you achieve them. <strong>POSSIBLE POINTS: 15 total</strong></td>

A doctor has her set of instruments and a musician has his. So, too, does a changemaker have a set of tools (techniques, approaches, models, frameworks) which enable them to effectively lead change. This session introduces you to two approaches for strategizing, communicating and taking action for change: the "theory of change" model and the "changemaker canvas." We will also discuss "systems thinking for changemakers" and how to evaluate and scale change initiatives.

In our final session we briefly look back at all that we've learned during these three weeks and we project forward to help you get clarity on all of the opportunities that lie ahead for you as you officially become a Berkeley Changemaker! Topics include:
- Catalyzing Change through Culture
- Opportunities to be a Berkeley Changemaker on campus
- Opportunities to be a Changemaker beyond campus
- Advice from fellow Berkeley Changemakers (Changemaker Advisory Board members).
- Closing

**FINAL:** Now that you have identified a positive change you would like to make on campus, in your community, or beyond, create an action plan. You will use the Changemaker Canvas as a tool to help you outline a strategy for taking action. Upload a completed canvas which details the change you hope to lead and the strategies/tactics specified in the model which will help you achieve your changemaker goal.

**THEN:** Take the "Changemaker Index" end-of-class survey.

Course Policies

Promptness
Homework assignments and discussion forum postings all have specific final due dates and times. You will not receive full credit if assignments are submitted after the indicated due date.

Further, each online activity must be submitted through the course website by the due date. Fax or email submission will not be accepted. Students who wait until the final hours prior to a submission deadline risk having problems with their ISP, hardware, software, or various other site access difficulties. Therefore, it is advisable to submit assignments through the course website early. Students should plan accordingly and get into the habit of checking the course website several times each week, and submitting and posting early.

Scheduling Conflicts
Please notify your Reader/GSI in writing by the end of the first week of the term about any known or potential extracurricular conflicts (such as religious observances or team activities). We will try our best to help you with making accommodations, but cannot promise them in all cases. In the event there is no mutually-workable solution, you may be dropped from the class.

Honor Code
The student community at UC Berkeley has adopted the following Honor Code: "As a member of the UC Berkeley community, I act with honesty, integrity, and respect for others." The expectation is that you will adhere to this code.

Collaboration and Independence
Reviewing lecture and reading materials and studying can be enjoyable and enriching things to do with fellow students. This is recommended. However, unless otherwise instructed, homework assignments and the final project are to be completed independently and materials submitted as homework should be the result of one's own independent work.

Cheating
Anyone caught cheating in this course will receive a failing grade in the course and will also be reported to the University Center for Student Conduct. Discussions and assignments are to be completed without the assistance of other people.

Plagiarism
To copy text or ideas from another source without appropriate reference is plagiarism and will result in a failing grade for your assignment and usually further disciplinary action. For additional information on plagiarism and how to avoid it, explore the resources linked below:

GSI Guide for Preventing Plagiarism

Academic Integrity and Ethics
You are a member of an academic community at one of the world’s leading research universities. Universities like Berkeley create knowledge that has a lasting impact in the world of ideas and on the lives of others; such knowledge can come from an undergraduate paper as well as the lab of an internationally known professor. One of the most important values of an academic community is the balance between the free flow of ideas and the respect for the intellectual property of others. Researchers don’t use one another’s research without permission; scholars and students always use proper citations in papers; professors may not circulate or publish student papers without the writer’s permission; and students may not circulate or post materials (handouts, exams, syllabi -- any class materials) from their classes without the written permission of the instructor.

Any test, paper or report submitted by you and that bears your name is presumed to be your own original work that has not previously been submitted for credit in another course unless you obtain prior written approval to do so from your instructor. In all of your assignments, including your homework or drafts of papers, you may use words or ideas written by other individuals in publications, web sites, or other sources, but only with proper attribution. If you are not clear about the expectations for completing an assignment or taking a test or examination, be sure to seek clarification from your instructor beforehand. Finally, you should keep in mind that as a member of the campus community, you are expected to demonstrate integrity in all of your academic endeavors and will be evaluated on your own merits. The consequences of cheating and academic dishonesty—including a formal discipline file, possible loss of future internship, scholarship, or employment opportunities, and denial of admission to graduate school—are simply not worth it.

Incomplete Course Grade
Students who have substantially completed the course but for serious extenuating circumstances, are unable to complete the final project, may request an Incomplete grade. This request must be submitted in writing or by email to the GSI and course instructor. You must provide verifiable documentation for the seriousness of the extenuating circumstances. According to the policy of the college, Incomplete grades must be made up within the first three weeks of the next semester.

Students with Disabilities
Any students requiring course accommodations due to a physical, emotional, or learning disability must contact the Disabled Students’ Program (DSP). They will review all requests on an individual basis.

- Request your Disabled Student Program Specialist to send the instructor a formal request before the official course start date by email.
- In addition, notify the instructor and your Online Learning Support Specialist, which accommodations you would like to use.
