Share stories relating to community, values, and the direction of science

Identify personalized paths of discovery

Open doors for collaborations and student-led discovery experiences.

Empower students for positive social change in original laboratory, community, and entrepreneurial discovery!

What is DISCOVERY?

Discovery is the foundation for innovation and the development of creative solutions to global challenges.

Discovery forms the core of individual journeys to achievement and success.

Discovery is a process, preparation for which requires intellectual, practical, and personal experiences that are not all currently embedded in most undergraduate programs.
